Workspace 365 modules

Workspace365

Everything simplified.

Modules based on user needs

The focus has shifted. Over the past years both, the organisations and users' needs have changed. The focus has shifted. IT-centred digital workplaces no longer dominate. Instead, HR leaders and Internal communication departments are shaping the landscape, aiming to make work easier, improving how people communicate and work together, supporting HR tasks and encouraging personal growth. The Digital Employee Experience (DEX) is key, and the market now prefers intranet functionalities coupled with an exceptional digital workplace.

Join us in embracing the shift

The Digital Employee Experience (#DEX) is the sum total of the digital interactions within the work environment.

With the rise of remote and hybrid working, the DEX is an integral part of the overall employee experience. A great DEX should never be seen as a 'nice to have'. It's far too important to be dismissed as an optional extra.

Let's be clear: Getting the DEX right is crucial for enhancing workflow and productivity. It improves communication and collaboration, as well as supports HR and self-improvement efforts.

Delivering an outstanding digital experience

Transformation rarely happens overnight. Companies take it step by step, starting with updating their workplace tools. After that, they move on to adopting new work methods. Eventually, they completely revamp their business operations.

Our modules have been developed to facilitate this change and are designed to be flexible in use so that you can always offer your customers what they need, when they need it.

Our modules

- Improving workflow and productivity
- Better communication and collaboration
- Enhancing HR and self-development

Supporting core teams

Our modules have been carefully crafted to ensure optimal efficiency. While our primary goal is to assist end users, we also concentrate on three key teams within an organisation to effectively facilitate the desired change.

HR, People & Culture

- Enhanced onboarding/offboarding
- Improve engagement tools
- Improve collaboration
- Culture promotion
- Autonomous teams

Internal Comms

- Unified communication
- Collaboration features
- Role base content targeting

IT & Information Management

- Seamless integration
- Digital transformation
- Improve DEX
- Aggregate data flow from any application
- Improve document management
- Maximise the value of the Microsoft stack

Workspace365

Our modules

Flexibility and productivity

Collaboration and engagement

Efficiency

Hybrid

The Hybrid module focuses on IT and connects legacy systems with the cloud, making hybrid work without IT frustration the new normal. With this module, you increase user productivity, regardless of time or location.

With a range of tools such as Citrix, ClientlessRDP, Azure Virtual Desktop, Fileserver, VMware, and Liquit, this module offers flexibility and efficiency without compromising security.

Engage

The Engage module promotes engagement and ensures that employees stay connected, no matter where they are or what they are doing. Providing information flows, centrally, both from the organisation to employees and vice versa, and among employees, contributes to a high level of engagement.

This wide range of possibilities strengthens the bond between employees and promotes effective information sharing and collaboration.

Unify

With the Unify module, you bring together all information sources, business data, micro-apps, and integrations (e.g., AFAS Online, Zenya DOC, Vilans Kick, ConnectWise, Autotask, Zaaksysteem, Zermelo, TOPdesk, Nedap Ons, Magister, and OpenIMS®) in one interface.

This simplifies information flows, increases employee efficiency, and provides easy access to relevant information.

Modules that adapt as needs change

Our three modules work alongside ever-present core features. We know the importance of these basics and the benefits they bring. These include:

- Email
- Single Sign-On (SSO)
- Role-based access
- Document app

- Open API
- Multi-device functionality
- Activity Feed

Our three new modules are Hybrid, Engage and Unify

Each module has a different focus and different benefits. At first, it may not be clear which modules best suit your needs. But within the Admin environment, it's easy to toggle modules on or off so that you can determine the best fit.

Modules and features

Workspace 365

- Shortcuts
- Fmail
- Documents
- Microsoft 365 Apps (Word, Excel, etc.)
- Activity Feed
- Global Search
- Single Sign-On (SSO)
- Mobile app
- Spaces
- Calendar
- How-To
- Azure App
- Multiple branding sets
- Power BI Micro App
- Web Content Micro App
- Announcements API

- Activity Feed API
- Maintenance
- Local apps
- App link
- Audit logging
- Owners (Permissions)
- Conditional Access
- Available User Apps API
- App Icons API
- Integration credentials API
- App requests
- Frequently used tiles
- Embed Tile group
- User provisioning

Hybrid

- Citrix XenApp
- Clientless RDP
- Azure Virtual Desktop
- Fileserver (WebDAV)
- + Editors
- VMware Horizon
- Liquit

Engage

- Events
- Announcements
- Knowledge Base
- Microsoft Teams
- RSS
- Birthdays
- Viva Engage
- Managed Signature
- Microsoft To-Do
- SharePoint
- Address Book
- YouTube

Unify

- AFAS Online
- Zenya DOC
- Vilans Kick
- ConnectWise
- Zaaksysteem
- AutoTask
- Zermelo
- TOPdesk
- Nedap ONS
- Magister
- OpenIMS
- Egnyte

Everything simplified.
