

 **Workspace365**

Everything simplified.

Stop making your teams dig for what they need

One workspace to find every SOP, form, schedule, and update, no more hunting.

Workspace 365 is made for manufacturers who are tired of:

SOPs on shared drives, HR docs in emails, and audits on paper

Team leads wasting time chasing versions

Field and floor workers locked out of systems they actually need

Too many apps. Not enough clarity.

We bring everything into one place, so your people can just get on with it.

Built to handle

Work instructions, TPM logs, maintenance forms

Induction packs, return-to-work docs, safety updates

Batch records, quality checklists, customer specs

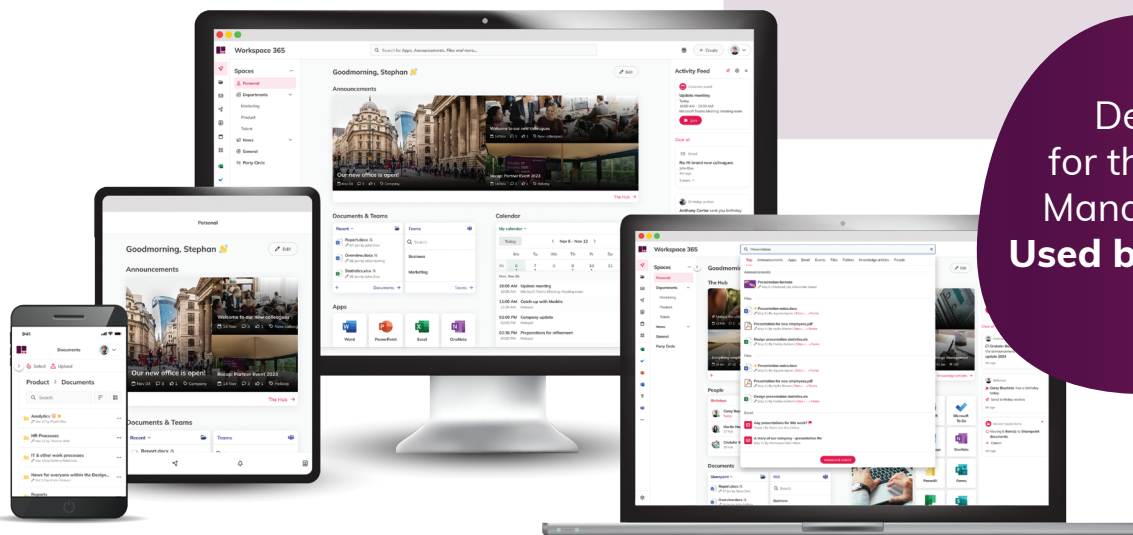

Messages, alerts, news — pushed to the right people

Access via kiosk, mobile, desktop — whatever your teams use

Designed
for the factory.
Managed by IT.
Used by everyone.

Works across every team

Production & maintenance

- Check SOPs, shift plans, TPM logs from any station
- Clear layout, big tiles, zero confusion
- Less paper, more time on tools

Quality & engineering

- Store audits, test logs, specs and CAPAs in one spot
- No version mix-ups. Always ready for inspection
- Make handovers clean and clear

HR & Training

- Keep onboarding, safety, and return-to-work docs easy to access
- Reach every worker, even those without a company email
- Reduce admin and boost accountability

IT & Digital

- Cut the sprawl, pull SharePoint, file shares and apps into one view
- Manage access by role, site, or team
- Browser-based. No installs. No patching.

If someone on your shop floor needs a form, where do they go?

If it's more than one answer, you need **Workspace 365**.

Workspace 365: All your tools. One starting point.

Let's talk about your teams, not just tech

Every factory floor, every office, and every team has its own way of working. Let's find out how Workspace 365 can make it easier for yours.
