First meeting went smooth, customer is interested in a customized Business App.

New Day at Work[™]

Business Apps

Next to web and local apps it's possible to add totally integrated Business Apps within Workspace 365. Business Apps can be activated easily from within the workspace. This makes it possible to integrate any business process which your current applications can't manage or to simplify your current applications.

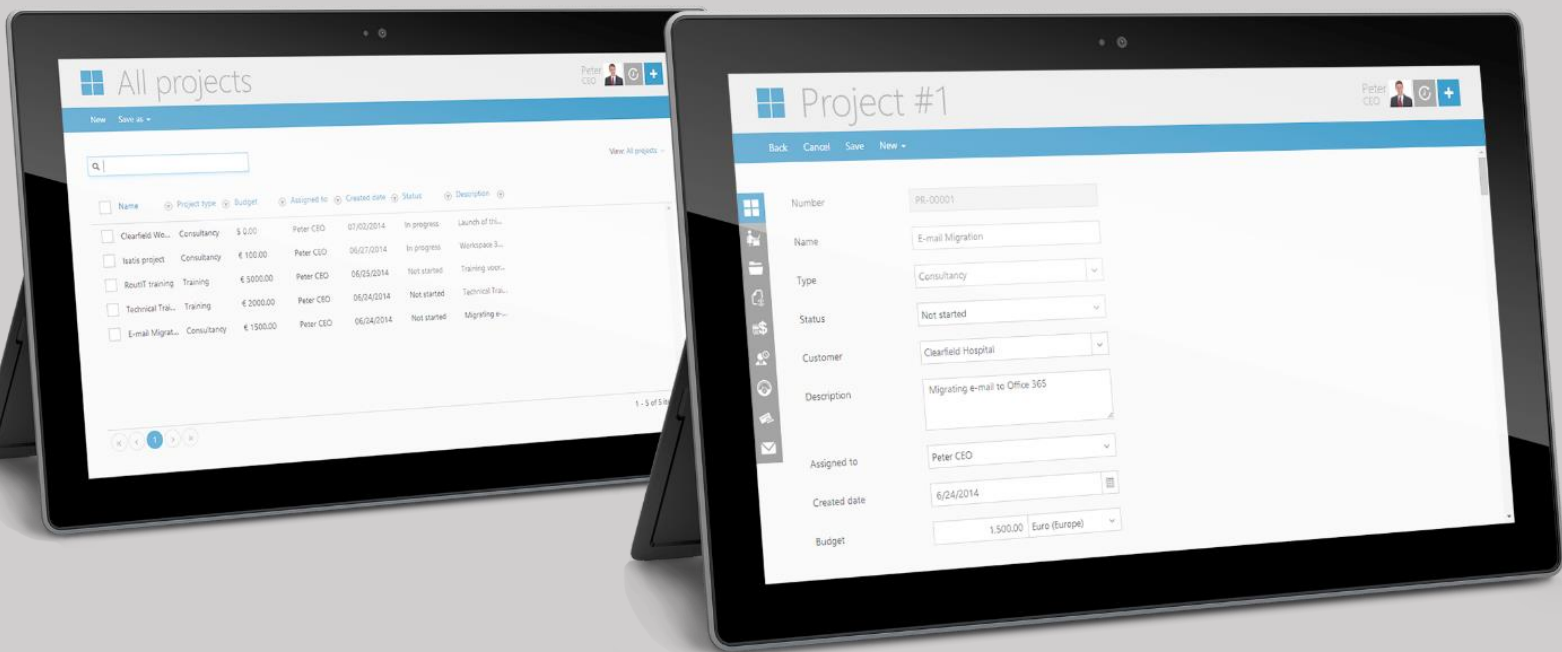

Workspace 365 has multiple standard & vertical Business Apps available to simplify your work.

Tailor made Business Apps

With the build in drag & drop builder you don't need any programming skills to build or adjust simple Business Apps. This way you can create a Business App for any vertical and make expensive customization projects, like projects for SharePoint, superfluous.

Integrate with software

Integrate the Workspace 365 Business Apps with other software applications. By doing this employees will only see what they need and they'll get an easy interface to make training superfluous. To integrate other software applications please contact us.

Standard Business Apps

These are the most used Business Apps in Workspace 365.

Projects

Easily link files and email to company information like contacts or activities. This will give you access to all your information using your browser. *requires all standard Business Apps

Activities

Keep your colleagues up to date and never miss an important chance by assigning activities to each other.

Mileage Usage

Workspace 365 is available on any device with a browser, making it perfect to easily keep track of your mileage usage.

Contacts

Gather all your contacts and link files, emails and other Business App info to them.

Relations

Create overview on your partners, customers, suppliers by linking files, emails and contacts to them.

Time Registration

Register your time and link them to a matter to keep overview on all your cases.

Standard Business Apps

Offers

By entering your offers you can easily check or change the status on the go. Next to this, you can export offers in your template with one click.

Expenses

Save time and frustration, let employees enter their expenses directly online using their workspace.

Invoices

Enter invoices and keep track on them from any device. You can export invoices in your template with one click.

Your Business App

Workspace 365 Business Apps can easily be tailor made using a drag & drop builder. With a couple of clicks you'll digitize any work process!

Vertical Business Apps - Education

These are the most used Business Apps for Education in Workspace 365.

School Projects

Easily link files and email to students or activities. This will give students access to all their information using a browser. *requires all education Business Apps

Activities

Students can set activities for their classmates to keep them up to date and never miss a deadline by assigning activities.

Students

Add students and link files, emails and other Business App info like results or parents to them.

Teachers

Create overview on your partners, customers, suppliers by linking files, emails and contacts to them.

Results

Create overview and give students insights on their results. This app is adjustable according to the courses offered by the school.

Vertical Business Apps - Healthcare

These are the most used Business Apps for Healthcare in Workspace 365.

Clients

Entering new clients or patients only takes a few seconds, making it possible to quickly link files, emails and medical records to patients.

Medical Records

Track the records of all your patients within a Business App and leave notes to create more clarity in your patient's medical records.

Invoices

Enter invoices and keep track on them from any device. You can export invoices in your template with one click.
